Education

Bachelor of Science, Computer Science — Weber State University, Ogden, UT

Dec 2025

- Web Development
 - Networking
- Software Engineering
 - Data Structures & Algorithms
- Databases

Senior Capstone

Led full-stack development of the **College of Engineering's Project Management System** using **ASP.NET Core, C#, Razor Pages, JavaScript, and SQL**, building modules for project tracking, intern assignments, time logging, reporting, and workflow automation while enhancing usability, scalability, and overall operational efficiency across the platform.

Professional Experience

Web Development Intern — GMRE, Inc., Ogden, UT

May 2025 – Present

- Developed and maintained internal and client-facing web applications, improving workflow automation and helping teams meet client deadlines.
- Collaborated with senior developers on front-end and back-end features using **PHP** and **JavaScript**.
- Participated in peer code reviews and functional testing, decreasing production bugs.
- Enhanced existing features, resolving legacy code issues and improving system reliability.
- Utilized **Git/GitHub** for version control and branching workflows, ensuring consistent and trackable development across the team.
- Leveraged **CI/CD** practices (GitLab), improving deployment efficiency and reducing manual release steps.
- Supported production deployments and collaborated with clients to smoke-test releases, ensuring stable updates with **zero rollback incidents**.
- Utilized **Jira** (Atlassian) to manage Agile sprints, track user stories, and coordinate tasks with senior developers, helping the team deliver features more consistently and ahead of schedule.

Information Technology (IT) Technician — GMRE, Inc., Ogden, UT

May 2024 – Present

- Provided hardware and software support to **300+ users** in a fast-paced environment, diagnosing PC/laptop issues, network connectivity, and software installation/refreshed systems.
- Standardized and maintained system build images and Windows installers, **halving workstation setup time** and ensuring up-to-date deployment packages.
- Documented installation and configuration procedures to streamline onboarding of new systems.
- Created work instructions in **Confluence** (Atlassian) for recurring technical issues, **reducing repeat troubleshooting time** and **lowering follow-up tickets**.
